

EDUCATIONAL PHILOSOPHY

*(Issued under the Decision of the Rector of Thai Nguyen University of Agriculture and Forestry,
No:1915/QĐ-ĐHNL on 31 December, 2018)*

The educational philosophy of the University is “Comprehensive development, reality and integration”. The detailed information is presented as follows:

1. Comprehensive development: Learners are trained to have good qualities in attitudes and behaviors, professional knowledge and skills; enhance learning capacities; develop creativity thinking; take social responsibilities; raise up the community consciousness; be patriotic and be faithful to the noble ideal of national independence.

2. Reality: The educational training is always associated with the needs of socio-economic development, scientific and technological progress; standards and modernization in accordance with present requirements of labor force. The process of teaching and learning is carried out according to the principle of hands-on learning in which students learn by doing; the education at university has been combined with the family and society. The teaching method is the learner-centered and is oriented toward a positive inclusion and lifelong learning

3. Integration: The training programs are developed on the basis of referencing, inheriting the advanced training programs of prestigious universities in the world and are accredited according to international standards. The learning environment and quality assurance conditions at the University attract good experts and international students to work, do the research and study. Lecturers and graduates have foreign language proficiency and working capacity to meet the requirements of international integration.
